# Legionella For Responsible Persons

## Course overview

The aim of this course is to provide delegated who have been assigned a role of responsibility for the management of Legionnaires disease within their workplace a foundation understanding of Legionnaires and it's causes; and what duties and responsibilities they'll have regarding effectively managing the risk from it.

The Approved Code of Practice (ACoP-L8) applies to the control of Legionella bacteria in any understanding involving a work activity and to premises controlled in connection with a trade, business of where water is used or stored i.e hot and cold water systems, cooling towers and evaporative condensers.

This course will enable you to assist the Responsible Persons to carry out the routine checks and inspections that are required to help mitigate the risks of legionnaires occurring.

## Learning outcomes

After successful completion of the course delegates will understand:

- Explain what Legionnaires Disease is, who it affects and how you become infected with disease
- Outline the relevant legislation and it's requirements
- Describe the precautions which should be taken to help prevent and control the risks associated with Legionella bacteria
- Understand what information needs to be monitored and recorded
- Explain what can go wrong and understand how outbreaks of the disease can be prevented
